

SHRAVANIKAMBLE

AI & MACHINE LEARNING ENGINEER

Pune, Maharashtra | +91 9067067285 | kambleshtravani277@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

AI & Machine Learning graduate skilled in Python, deep learning, and full-stack development, with hands-on experience building ML/NLP applications and production-ready software through internships and academic projects. Seeking a job as an AI/ML Engineer or Software Developer to build production-grade, data-driven solutions.

EXPERIENCE

Software Developer Intern | NEUAILABS (Remote)

Jan 2025 – Feb 2025

- Collaborated with an experienced development team to learn and contribute to the design of emerging software solutions.
- Gained hands-on exposure to modern software development practices and tooling in a fast-paced, remote-team environment.

Web Development Intern | ITAsset Pvt. Ltd. (Offline)

Jul 2022 – Sep 2022

- Implemented feature alterations and enhancements across multiple live projects spanning front-end (HTML/CSS, Bootstrap) and back-end (JavaScript).
- Analyzed existing codebases and resolved defects to optimize application output and performance.
- Coordinated testing and validation procedures in line with the Software Development Life Cycle (SDLC).

PROJECTS

AI Voice Assistant using Python & Gemini AI

Tech: Python, Flask, Google Gemini AI, REST APIs, Render

Live Demo: <https://ai-voice-assistant-qbd8.onrender.com>

- Built and deployed a web-based AI voice assistant that combines speech recognition with Google Gemini AI to understand free-form spoken queries and generate intelligent, context-aware responses.
- Integrated real-time information retrieval — weather, news, and web search — along with system control, an email sender, and persistent memory management, and deployed the full application on Render.

Classification & Captioning of Aircraft Damage using ML

Tech: Python, VGG16, Transformer/BLIP, Computer Vision, NLP

- Built a dual-model pipeline combining VGG16 for image-based aircraft damage classification with a Transformer-based captioning model to auto-generate descriptive damage reports.
- Applied computer vision and NLP together to turn raw inspection images into structured, human-readable output — reducing manual review effort.

Sentiment Analysis for Amazon & Yelp Reviews

Tech: Python, Logistic Regression, NLP

- Built and trained a Logistic Regression model to classify Amazon and Yelp reviews into positive, negative, or neutral sentiment.
- Applied NLP-based text preprocessing and feature extraction to improve classification accuracy across both review datasets.

EDUCATION

Genba Sopanrao Moze College of Engineering, Pune

2023 – 2026

BE, Artificial Intelligence & Machine Learning | CGPA: 9.05 / 10.0

Government Polytechnic, Pune

2020 – 2023

Diploma in Information Technology | 79.73%

CERTIFICATIONS

- Master In Software Development with Full Stack – Phoenix Infotech
- HTML/CSS – Spoken Tutorial Project
- Java – Gravity Software Class
- C, C++ – Seed Infotech

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, CNN, Logistic Regression, VGG16, BLIP Transformer, Google Gemini AI

Web Development: Flask, HTML, CSS, JavaScript, REST APIs

Databases & Tools: MySQL, Git, GitHub, Render, SQL

Core CS: Data Structures & Algorithms, SDLC, Testing & Debugging

ADDITIONAL INFORMATION

Languages Spoken: English, Hindi, Marathi

Soft Skills: Teamwork, Time Management, Leadership, Critical Thinking, Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability
